# Home Page

Additional Features – None

Currently have completed all the features mentioned in the assignment guidelines.

Challenges: -

1. Selecting relevant content for the website – I used some of the contents from few websites. Those are listed in the reference.
2. CSS Styling – Bootstrap helped me to make a basic structure for the website, later on modified css using my "style.css" file.
3. Doubts with some features – Piazza helped me solve some of my doubts. Many of my peers had asked and resolved multiple doubts. This helped me understand some of my queries.

Easy: Since it was an assignment where we only had to build static pages hence it was relatively easy to code.
